

COURSES

HYPERBARIC FIRE SAFETY

Fire in a hyperbaric environment poses unique and serious risks, requiring specialized knowledge and preparedness. Our 3-day Hyperbaric Fire Safety Course provides essential training for professionals working in pressurized environments. Participants will gain practical skills and critical knowledge to enhance safety in hyperbaric chambers, diving bells, and other pressurized settings.

Who should attend?

Hyperbaric physicians, nurses, operators, technicians who require specific training in fire safety in a hyperbaric environment. Participants should have completed an introductory course in hyperbaric medicine.

COURSE CONTENTS

1. Physical and chemical properties of fire under different circumstances
2. Type of fire extinguishing systems in hyperbaric chambers
3. Hyperbaric fire suppression system
4. Firefighting and extinguishing strategies
5. National Fire Protection Association (NFPA 99) Standards
6. Measures to be taken in case of fire outbreak during hyperbaric operation
7. Burn wounds and smoke inhalation injuries
8. Organization of first aid and evacuation of patients from a hyperbaric room after a fire
9. Fire protection in Class A, B and C chambers
10. Practical Sessions
